Communicable Disease Report, Volume 27, 3

Up to and including 1994	?
1995	39
1996	39
1997	42
1998	71
1999	67
2000	45
2001	45
2002	61
2003	90
2004	79
2005	121
Cumulative Total	699

Sometimes people don't get tested until years after infection, or they wait to go to a larger centre because they are afraid to get tested in their home. Therefore these statistics may be skewed because they indicate how many people have *already* tested positive in Newfoundland and Labrador.
